

# Capability Statement

## Core Competencies

CodeBright helps federal agencies and enterprises streamline operations, improve efficiency, and enhance security through AI-driven software solutions and automation. Our expertise ensures compliance, scalability, and high-performance results.

- AI-Powered Software Development
- Custom AI-driven solutions tailored to agency needs
- Enterprise Workflow Automation
- ERP, CRM, and automation tools to enhance efficiency
- Cloud-Native & DevOps Solutions
- Secure deployment on AWS, Azure, and Google Cloud
- API Development & System Integrations
- Seamless connectivity across platforms
- Web & Mobile Development

## Differentiators

**Agile and Responsive:** CodeBright will respond to client requests within **24 hours**, ensuring flexibility and adaptability in project execution.

**Fast Turnaround Time:** We will complete software development projects **30% faster** than the industry standard while maintaining security and compliance.

**Rapid Deployment and Agile Development** – By leveraging an iterative agile approach, we will deploy solutions with a **minimum of 2-week sprint cycles**, allowing continuous improvements and faster go-to-market strategies.

**Cloud & Security Focused:** We comply with **FedRAMP, HIPAA, and GDPR** standards, ensuring that all cloud-based deployments meet government and enterprise security requirements.

**Cost-Effective Innovation:** By implementing AI-powered automation, we reduce operational costs by **up to 40%**, improving efficiency while maintaining compliance and performance benchmarks.

## Past Performance

### Kaiser Permanente NW Telmedx

**Scope of Work:** Built a telemedicine video platform enabling remote consultations with high-resolution video even no wifi with low signal and AI-powered features.

**Reference Contact:** Clint Carney, [rlanglin@telmedx.com](mailto:rlanglin@telmedx.com), (619) 917-6003.

### Association for Professionals in Infection Control and Epidemiology, Inc.

**Scope of Work:** Developed a Salesforce-based web application for managing electronic medical templates. Key features included Salesforce SSO integration, a Super Admin dashboard, customizable templates, version control, and export functionality (Word/PDF) to streamline document management in the healthcare sector.

**Reference Contact:** Alexandr Gumbar, [agumbar@apic.org](mailto:agumbar@apic.org), (202) 454-2624

### NV Roofing

**Scope of Work:** developed and transformed into SaaS a CRM/ERP platform for a construction firm, featuring satellite-based estimating, proposal management, portals for clients and subcontractors, supplier integrations, and full AP/AR workflows. The system streamlined operations and enhanced visibility—capabilities well-suited for government use in construction and asset management.
